

# SOMA NYIRO

## EDUCATION

Bláthy Ottó Titusz Informatikai Technikum

At my high school I learnt about many aspects of IT such as C# and Javascript programming, website creation, networking, office and the usage of the Linux operating system.

BeCube Python course

At this course I familiarized myself with Python and some of its libraries.

Cisco Networking course

During high school I completed an additional course to further my networking skills.

Saxion University of Applied Sciences

Here I'm currently learning a lot about C# programming and the software development process as well as design thinking.

## SKILLS

I am an effective C# and .NET developer having years of experience with the language.

I have minor experience in Python, Java and JavaScript. Learning new languages is natural for me.

I'm also a confident learner, I can quickly adapt to new languages and environments when the need arrives.

I have basic networking skills with which I can set up and maintain simple networks.

## ABOUT ME

I'm a friendly and ambitious student aspiring to be a successful software developer. I work well with others and enjoy sharing my work. I'm a creative person and I love making things, I always have a new idea in mind.

## OBJECTIVE

My childhood dream was to become a game developer, because of this I stumbled on programming very early on in life. I quickly fell in love with it and I've been coding ever since. Now I imagine my future as a tool developer either for game studios or other industries.

## INTERESTS

I enjoy creating scripts for personal convenience and speeding up workflows. I also like doing sports to stay healthy. I especially like volleyball and table tennis. I also like to explore exotic places and taking pictures for inspiration.
